Description

Negative testing_If the password is invalid, the customer should see an error message explaining what is wrong.

The password is invalid/weak if it does not follow 1 of the following recommendations:

- at least 8 characters
- at least one upper case
- at least one small case
- at least one number case

Preconditions:

1. The user must have access to the internet and the website www.notino.ro.
2. The user must not already have an account on the site.
3. The user must have a valid email address.
- 4.

The user should be on the Sign-up form page (see  [PM-10](#) Done)

Test Step	Test Data	Expected Result
1. On the Sign-up Form page, enter a valid email address	pexepa1211@soombo.com	The email address can be added and no error message appears
2. On the Sign-up Form page, enter a weak/invalid password formed only by numbers	123456	The password field can be edited and a caution message that the password is weak appears
3. On the Sign-up Form page, enter a weak/invalid password formed only by small cases	ahshfg	The password field can be edited and a caution message that the password is weak appears
4. On the Sign-up Form page, enter a weak/invalid password formed only by only uppercases	AVFGF	The password field can be edited and a caution message that the password is weak appears

Test Step	Test Data	Expected Result
5. On the Sign-up Form page, enter a weak/invalid password formed only by 7 characters, but respect the other recommendation	Tokyo21	The password field can be edited and a caution message that the password is weak appears
