[PM-16] When using an invalid email address, no error message appears

Created: 06/May/23 4:55 PM - Updated: 23/Sep/23 1:47 AM

Status:	To Do
Project:	Pavelina Mutu
Component/s:	None
Affects Version/s:	None
Fix Version/s:	Test1

Type:	Bug	**Priority:**	High
Reporter:	ITF Classes	**Assignee:**	Unassigned
Resolution:	Unresolved	**Votes:**	0
Labels:	None		
Original Estimate:	Not Specified		
Remaining Estimate:	Not Specified		
Time Spent:	Not Specified		

Agile

Sprint:	PM Sprint 1

Description

When using an invalid email address, no error message appears.

Steps to reproduce:

Open Edge Browser

Navigate to www.notino.ro

Go to the Sign-up/Profile Page
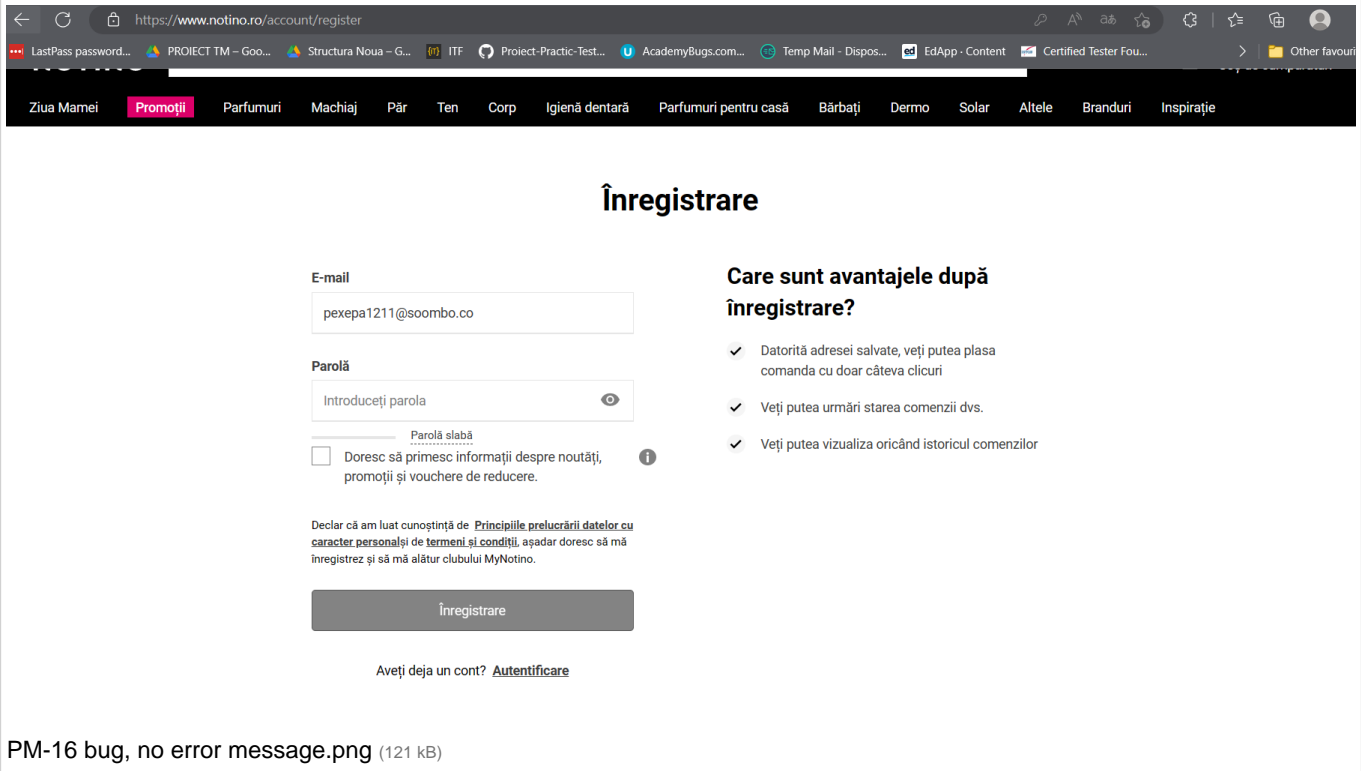

Click on the "Înregistrare" button

On the Sign-up Form page, enter an invalid email address

pexepa1211@soombo.co

Expected result: The email address can be added and an error message appears

Actual result: The email address can be added and no error message appears

Agile	
Sprint:	PM Sprint 1

Description

When Screen Reader extension is used the text is not correctly read.

Steps to reproduce:

The user is logged on the website following the steps from test PM-17 Done and he clicks on Promo#ii section

In the drop-down section, select Promo#ii la parfumuri

Activate the Screen Reader Extension and browse on the page in the different links, tabs

Expected result:

The Screen Reader accurately describes the various components of the webpage: titles, numbers, reads texts, points out blank boxes/images.

Actual result: The Screen Reader is blocked at the product quantity multiple times through the page. When text is pointed out several times, the Screen Reader still detects the product quantity (in ml) or price.

Agile	
Sprint:	PM Sprint 1

Description

Sorting the prices in a descending order in Promo#ii section does not work accordingly,

Steps to reproduce:

The user is logged on the website following the steps from test PM-17 Done and he clicks on Promotii section

In the drop-down section, select Promotii la parfumuri

Under Promo#ii - Parfumuri click on Recomandat and from the drop-down list select Pre# descrescător

Expected result:

Pre# descrescător can be selected as a price sorting type and the prices are sorted as descending
(from the most expensive to the cheapest)

Actual result:

The prices are not in a descending order, rather products with various prices are scattered in between those with prices in a descending order.
